

NESTLE-aluminium tripod, light

Article number: 13000000
LIGHT VERSION

DESCRIPTION

Light version

- The lightweight 13000000 is especially designed for levelling, which often requires quick repositioning.
- Quick locking with excentric clamping levers.
- New patented circumferential clamping system. The clamping force takes effect on the outer and inner profiles. The force is always constant at every grade of extension.
- We only use high-quality aluminium for the tubes and profiles. The anodized aluminium parts are weather-proof and designed for toughest use.
- The aluminium tubes slide without jamming. This prevents the material from wear and keeps the tripod ready for use over a long period of time.
- Tripod head made of polymer-fibreglass composite.
- The special feature is the circular vial which is integrated in the tripod's head-ideal for quick setting up.
- The plastic parts are made of polymer-fibreglass composite and are extremely robust. These quality characteristics make NESTLE tripods the superior choice in comparison to competitive products.

APPLICATIONS

Applications

- Low weight for easy transport and positioning.
- The plastic tips are ideal for indoor measurements.

SPECIFICATIONS

Head	Flat, with circular vial
Working range, 1m distance of tips	90–170cm
Transport length	105cm
Clamping	Excentric, circumferential
Weight	2,200g
Thread connection	5/8"

ACCESSORIES

MIT DEN BESTEN MESSEN

Feature

- Plastic tips for safe positioning on smooth ground and to prevent damages of surfaces like parquet flooring and paving tiles.
- Head with circular vial.
